Lab: Save Your PowerPoint Presentation as a PDF

In the peer-reviewed assignment that follows, you will be required to upload your final presentation in a PDF format. The optional lab below provides the steps to save a PowerPoint presentation as a PDF.

Estimated time needed: **5 minutes**

There are many benefits of converting your PowerPoint presentation to a PDF file while sharing it with your audience. First, it is much lighter than the original document, and it can be opened on any device. You can protect your data as no one is able to make changes in the presentation in a PDF file, and the formatting also remains intact.

In this lab activity, you'll learn how to save a PowerPoint presentation to a PDF document.

Software Used in this Lab

Although you can use either the Windows or MacOS desktop versions of PowerPoint if they are available to you, we would recommend using the *PowerPoint for the web* version as it is free and readily available to everyone. There are minor differences in the interface and features available to you.

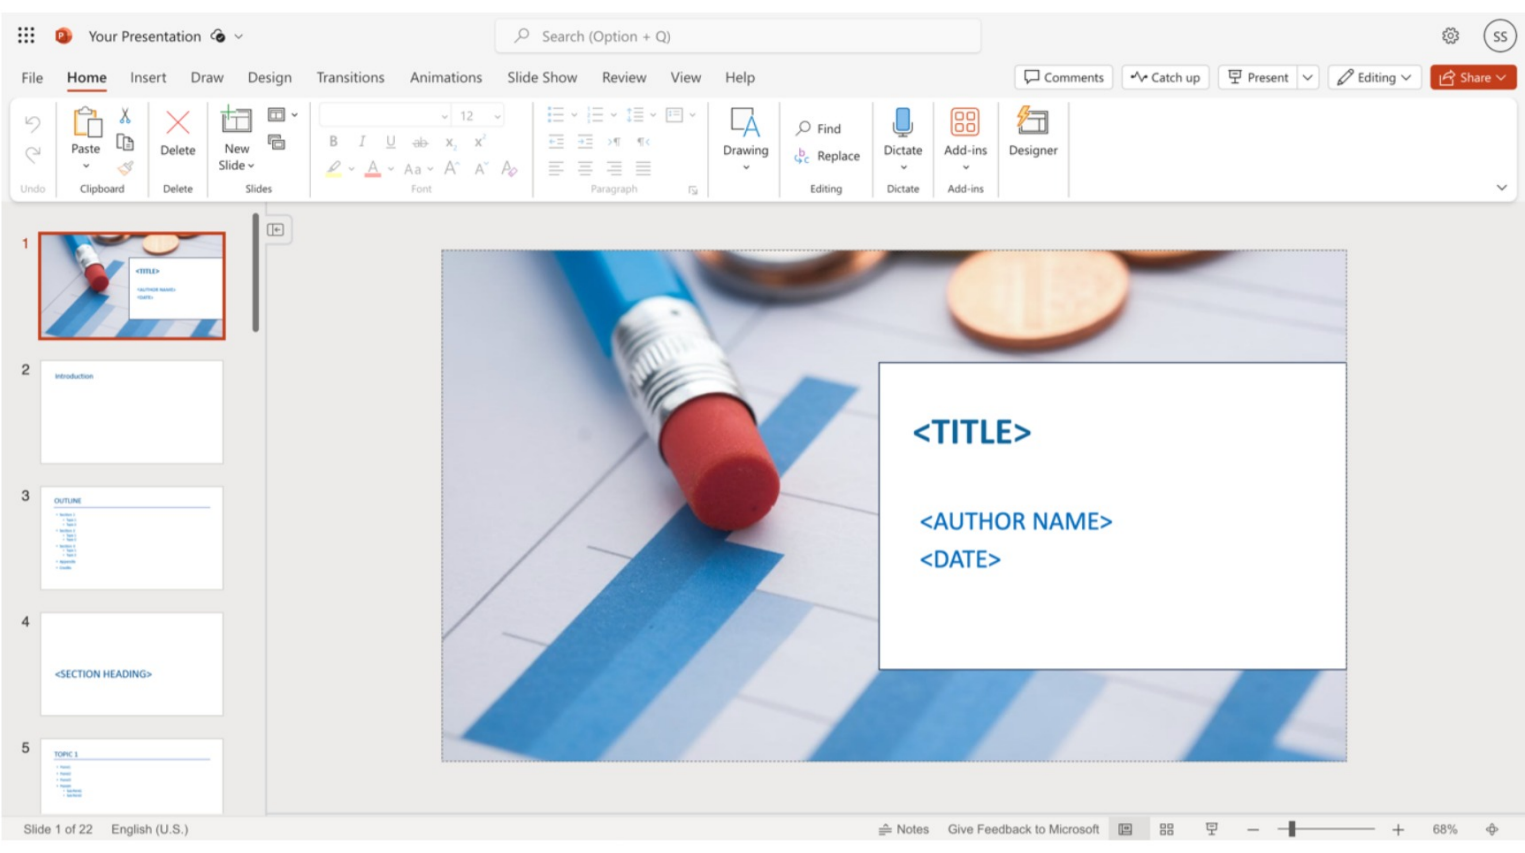
If you do not have access to the software yet, you can follow the instructions in the following lab to get started with it and familiarize yourself with the tool: **Lab: Getting Started with PowerPoint Online**.

Learning Objectives

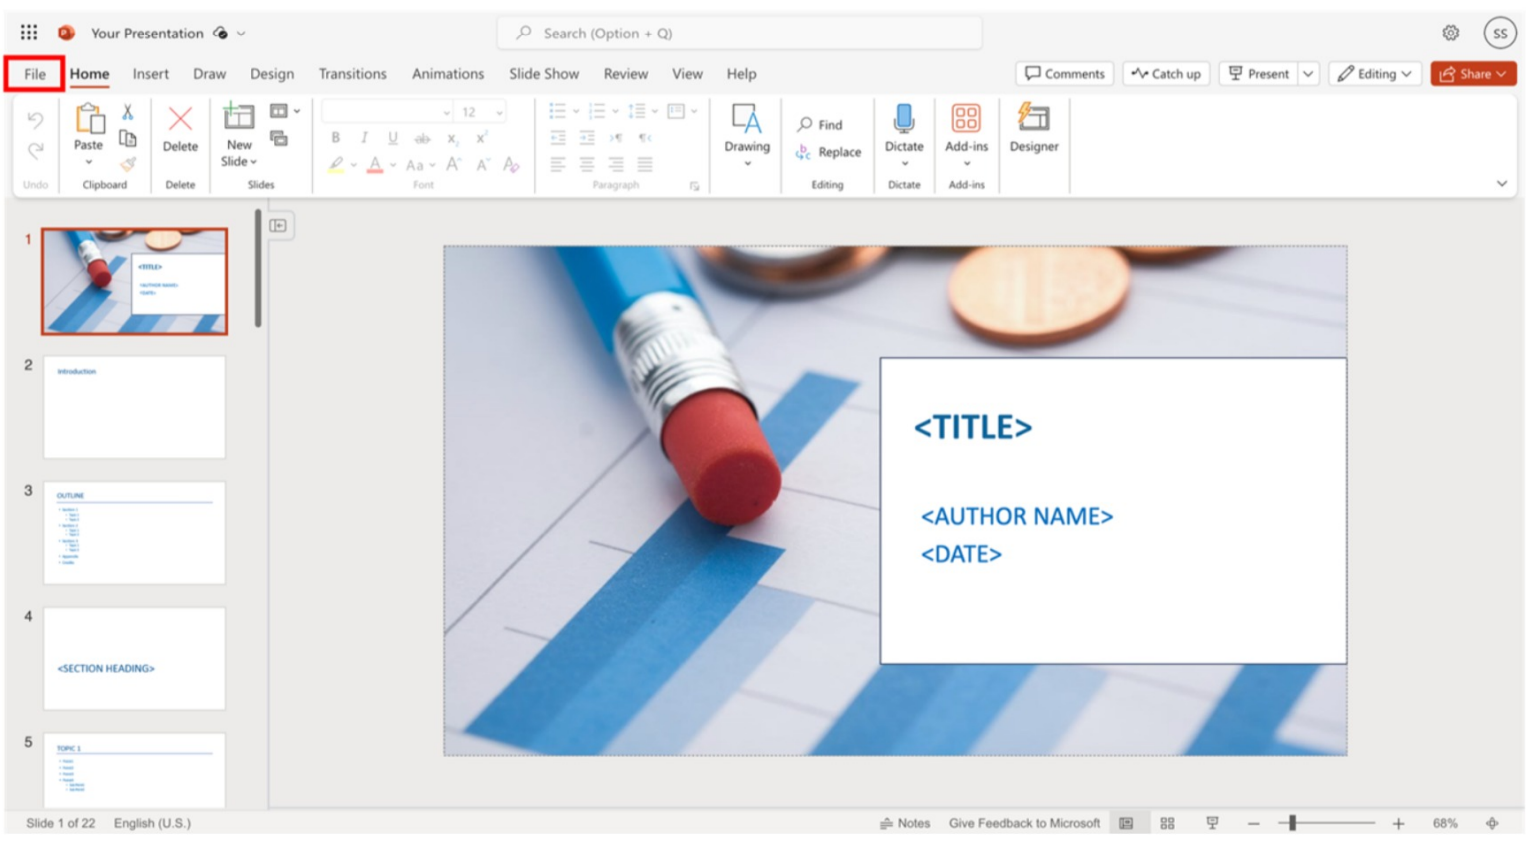
- Save your PowerPoint presentation as a PDF file in PowerPoint for the Web.
- (Optional) Save your PowerPoint presentation to a PDF file in PowerPoint for Windows.
- (Optional) Save your PowerPoint presentation to a PDF file in PowerPoint for MacOS.

Exercise 1: Save your PowerPoint presentation as a PDF file in PowerPoint for the Web

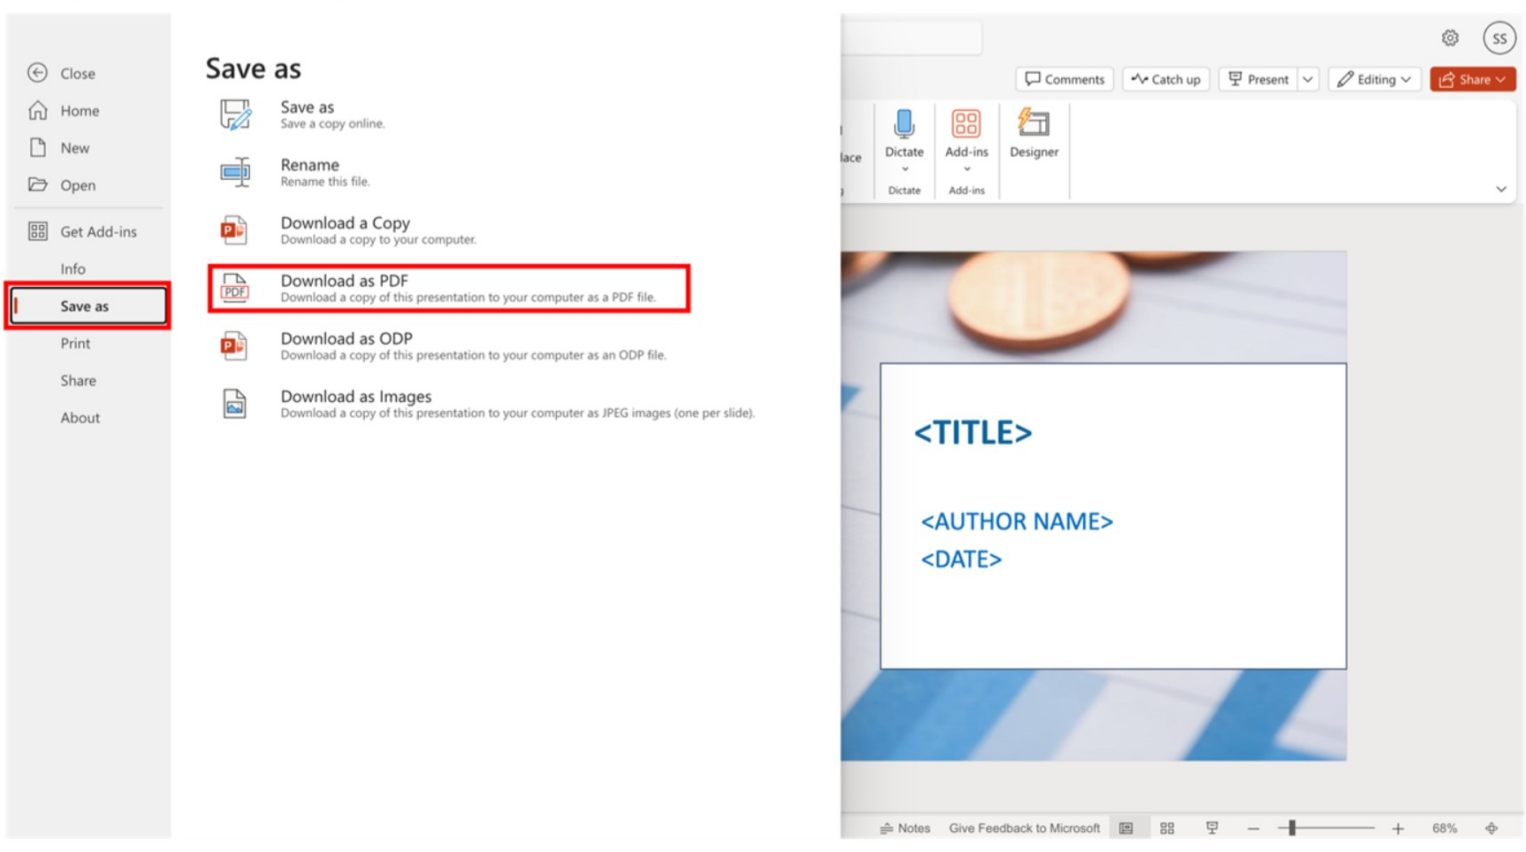
1. Open your presentation in PowerPoint for the web.



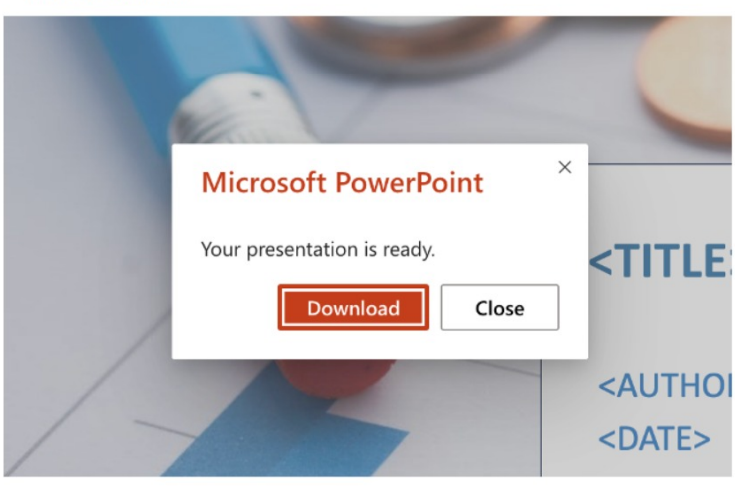
2. Click **File**.



3. Select **Save as** and then **Download as PDF**.



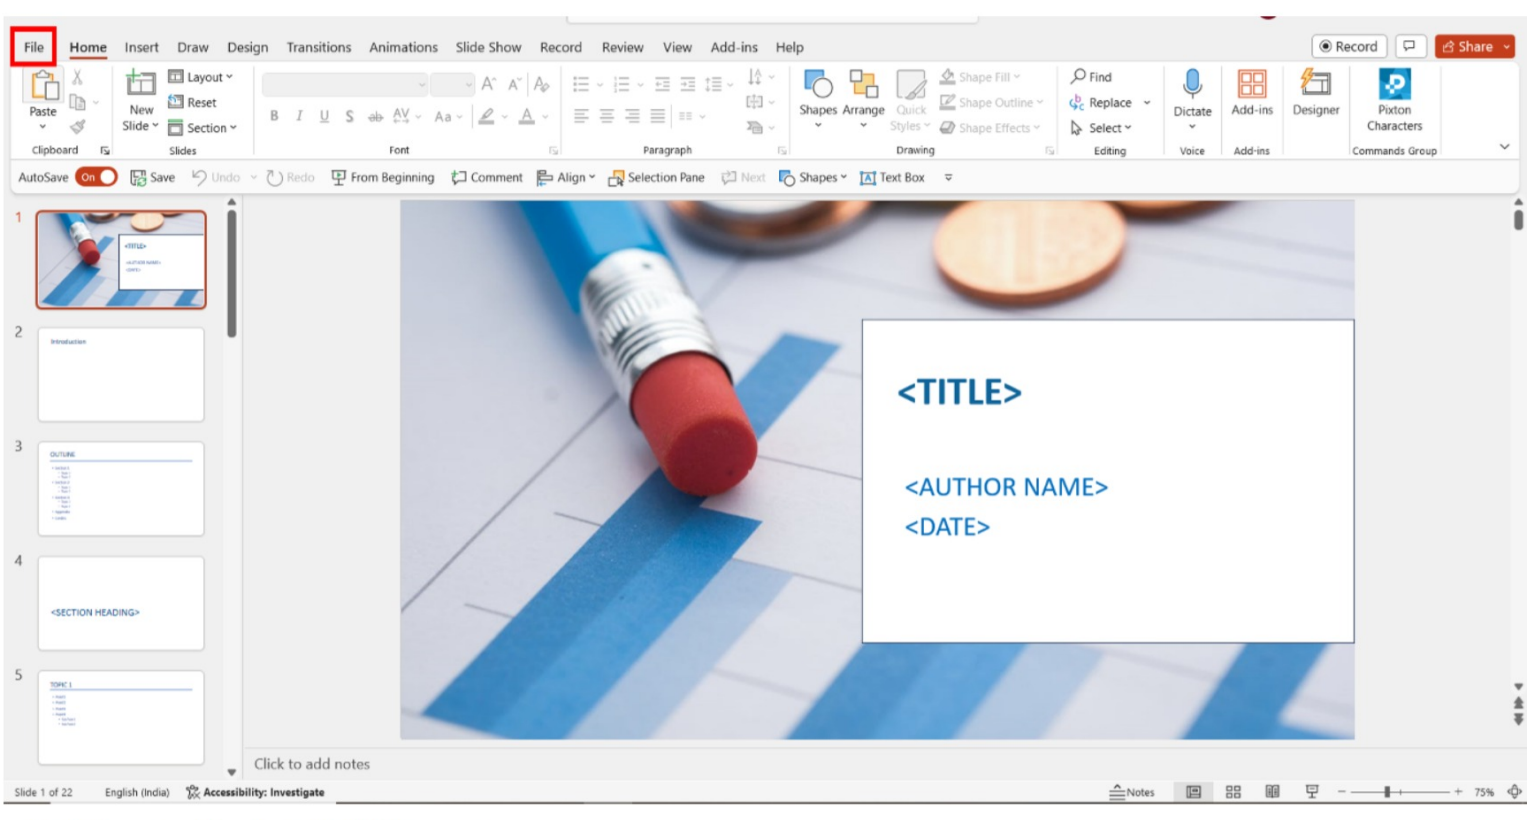
4. Click **Download**.



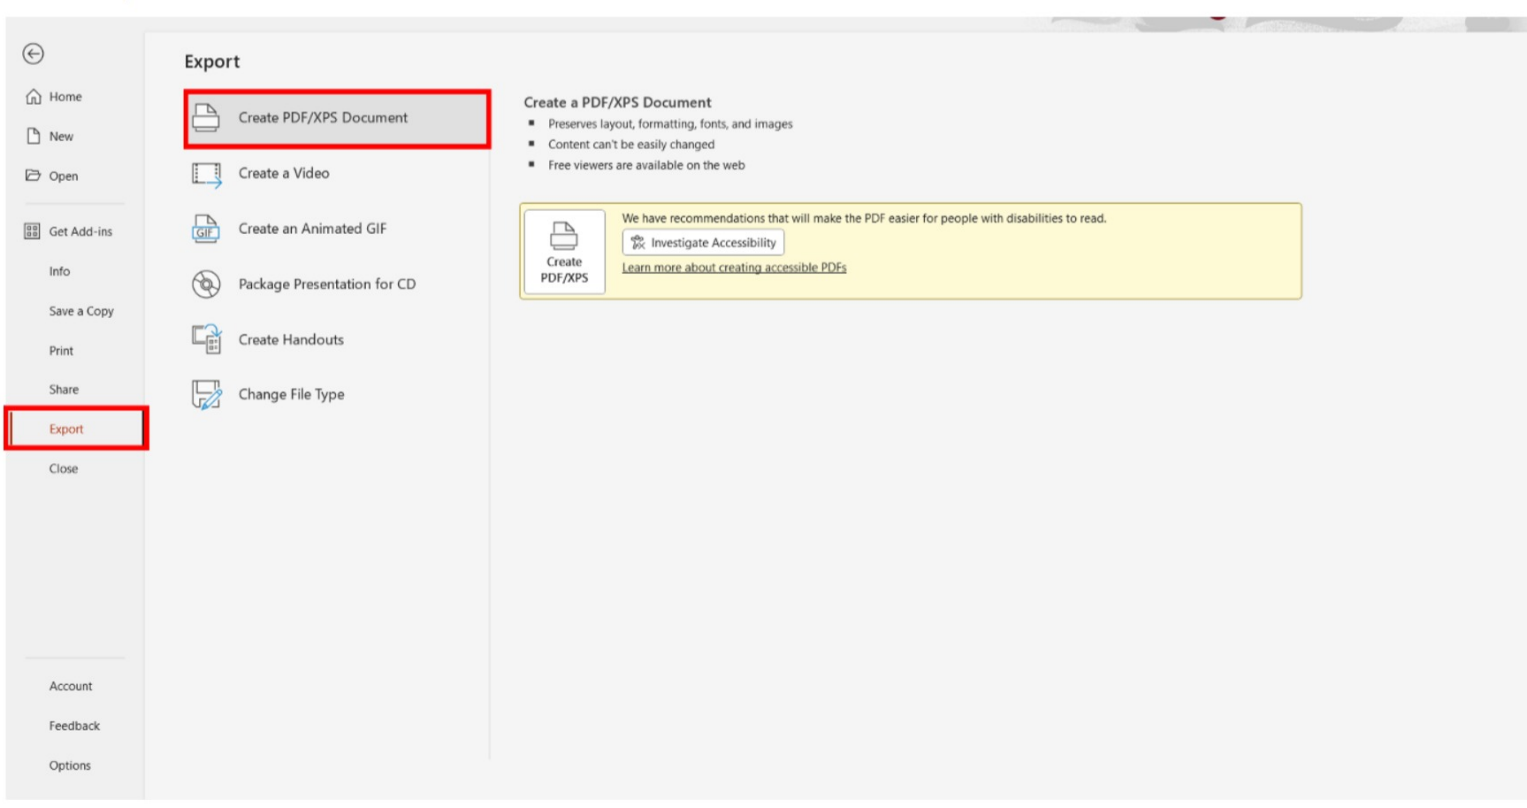
5. Save the file in your local storage.

(Optional) Exercise 2: Save your PowerPoint presentation as a PDF in PowerPoint for Windows

1. Open your file in PowerPoint for Windows.
2. Click **File**.



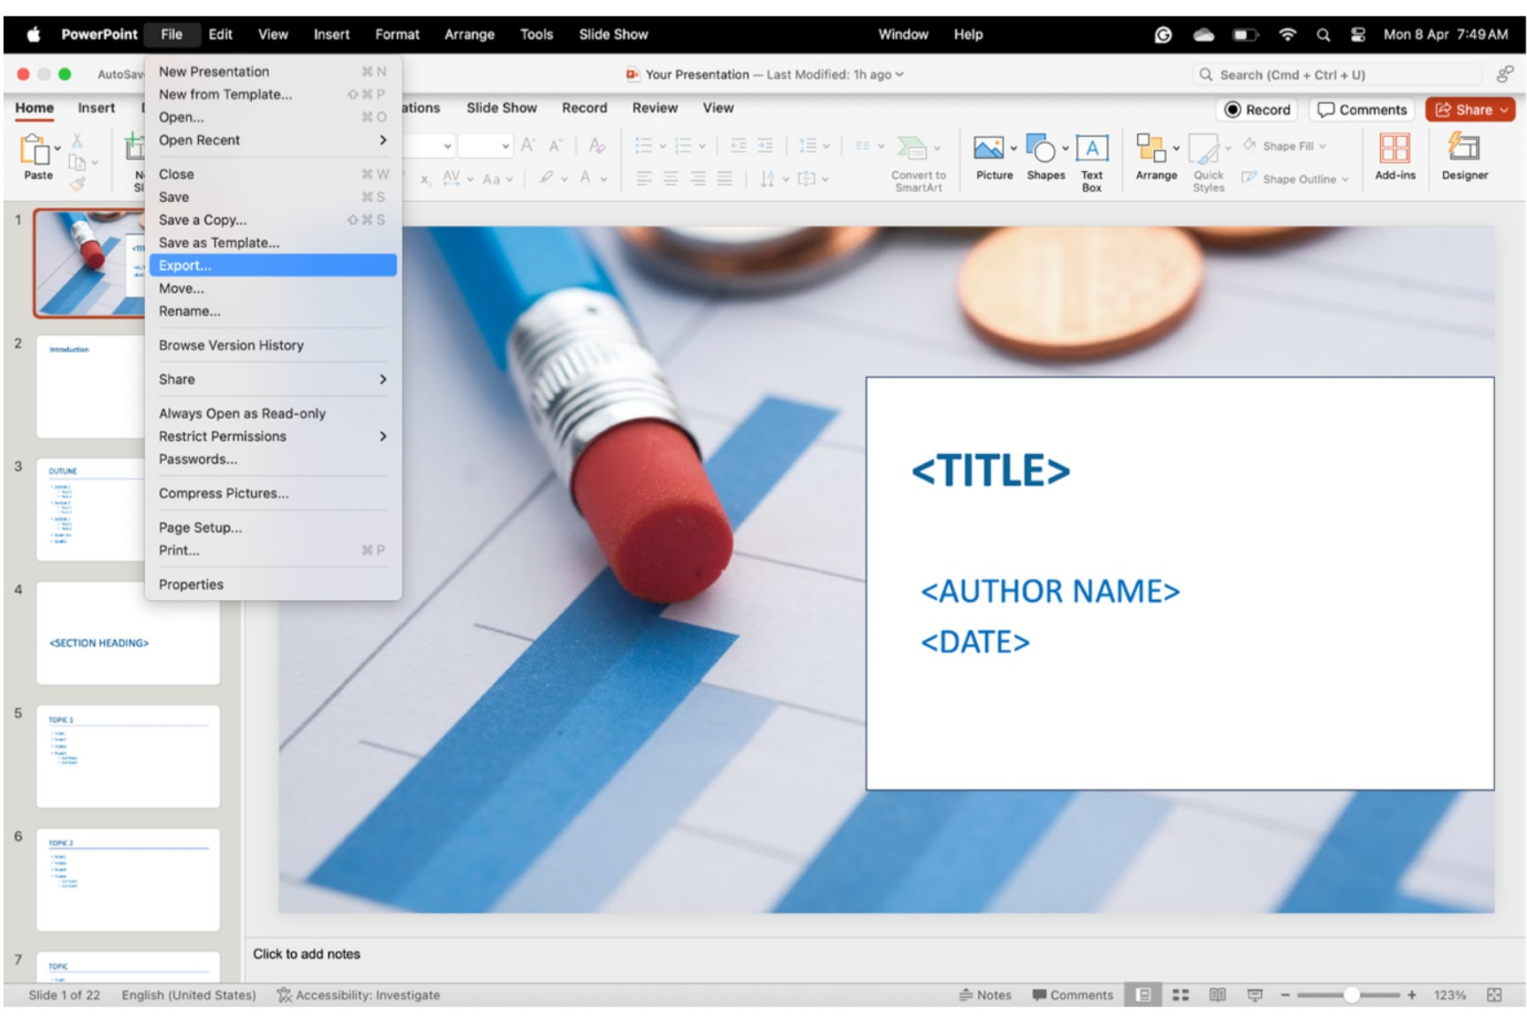
3. Select **Export** and then **Create PDF/XPS Document**.



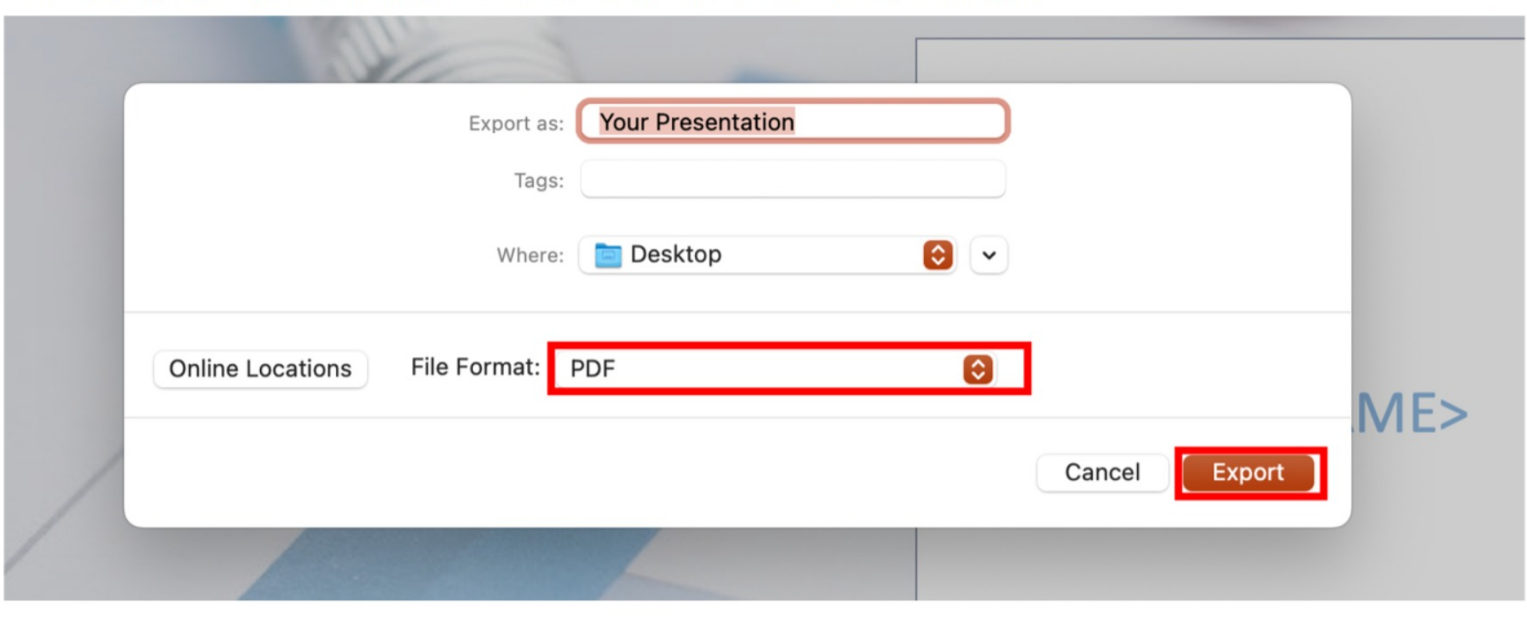
4. Save the file to your local storage. While saving the PDF to your local storage, ensure that the file format you have chosen is **PDF**, and then click **Export**.

(Optional) Exercise 3: Save your PowerPoint presentation as a PDF in PowerPoint for MacOS.

1. Open your file in PowerPoint for MacOS.
2. Click **File** and then select **Export**.



3. While saving the PDF to your local storage, ensure that the file format you have chosen is **PDF**, and then click **Export**.



Congratulations! You have completed this lab and are ready for the next topic.
