Lab: Optimizing Visualizations and User Interaction

Estimated time needed: 90 minutes

In this lab, you will add and manage widgets and create a dashboard using hierarchical navigation in Tableau.

Required Software

You will additionally need the latest version of the recommended **Tableau Desktop (Public Edition)** desktop software. You may also use the free **Tableau Public online platform**, but some tasks, such as creating a dashboard, may be easier to do using the desktop application if you can.

Prerequisites

You need a free Tableau Public account for this lab. If you haven't already done so, you can sign up for an account using the steps here.

Data Set

The lab uses a sample data set called **World Indicators Data.xls** to showcase the Tableau features used in these lab exercises.

If you don't have this data set, you can download it from the following file:

World Indicators Data.xls

Objectives

After completing this lab, you will be able to:

- Create and manage widgets
- Create a dashboard using hierarchical navigation

Exercise 1: Use and format tooltips

In this first exercise, in Tableau Desktop (Public Edition), you will use tooltips to display additional data. You will need to open the Horse.hyper workbook, which you saved in Tableau Desktop in Lab 1.

1. In **Tableau Desktop (Public Edition)**, in the **Data** menu, click **Recent**, then select **Horse.hyper** from the recently used list. This is the workbook that you saved in Tableau Public in Lab 1 and then uploaded to your account in Lab 2 in **Exploring Resources**.
