# Lab: Customizing Visualizations in Tableau

Estimated Time needed: 60 minutes

## Required Software

You can complete the lab using the free Tableau Public or Tableau Public Desktop version.

## Prerequisites

You need the free Tableau Public account for this lab. If you haven't already done so, you can sign up for an account using the free trial.

## Data Set

The lab uses a modified sample dataset called **OPS Trainer**. Open this in **desktop** to discuss the customization of visualizations in Tableau.

## Objectives

The exercises in this lab learn you how to customize your visualizations in Tableau Public following best practices. In this tutorial, we will, you will

- Customize existing visualizations in Tableau
- Create and customize a map visualization in Tableau

## Exercise 1: Customize Existing Visualizations in Tableau

In this exercise, you will open an existing workbook and edit your data contents to produce tile and customize some of the visualizations.

1. Navigate to the **Tableau Public home page**.
2. Click **Sign In** and enter your credentials and click **Sign In**.
3. On your workbook, click the pencil icon to the right corner of the page and click **My Profile**.

4. Click the **Gallery** tab.
5. Select the **OPS Trainer** tile.

6. In the top right, click the **Edit** icon.

7. In the top right, click the **Edit** icon.

8. Click the bottom of the page, select the **Bubbles** dashboard.
9. Drag **Revenue** from the **Data** pane to **Label** on the **Marks** card.

10. Click the bottom of the page, select the **Bubbles** dashboard.
11. Drag **Revenue** from the **Data** pane to **Label** on the **Marks** card.

12. Now, each circle in the visualization shows both the product name and the revenue details.

13. In the **Marks** card, click the small black arrow in the drop down list and change it from **Circle** to **Square**.

14. The **Bubbles** visualization now displays its shapes as squares instead of circles.

15. Hover over the **Product Name** legend in the right hand pane, click the small black arrow, and click **Edit Colors**.

16. Click **OK**. Then, close the **Edit Colors** dialog box.

17. Fix **Bubbles** to call it look like using the **Winter** color palette.

18. Double click **Sales** tile above the **Bubbles** tile above the **Bubbles** tile. Change the color to **Tableau Hues**, the **Sort** to **Sort**, **gradient**, **bold**, **dark grey**, and **center aligned**. Then click **OK**.
