Lab: Customizing a Story in Tableau

Estimated time needed: 60 minutes

Required Software

You can complete the lab using the New Tableau Suite, or Tableau Public Desktop version.

Prerequisites

You need the free Tableau Public account for this lab. If you haven't already done so, you can sign up for an account using the free trial.

Dune Set

The lab uses a modified version dataset called **OPS Data** that is designed to showcase the customization of stories in Tableau.

Objectives

The exercises in this lab basically pose how to customize a story in Tableau Public.

- Exercise 1: Customizing a Story in Tableau
- Exercise 2: Customizing a Story in Tableau

Exercise 1: Customizing a Story in Tableau

In this exercise, you will open an existing workbook and add a story that contains a previous lab and customize a story in Tableau.

1. Navigate to the **Tableau Public home page**.
2. Sign in to your Tableau Public account, if you have one, and click **SIGN IN**.
3. If a pop-up appears, click the profile icon in the top right corner of the page, and click **My Profile**.

4. On the **Home** tab, select **My Story** as.

5. In the top right, click the **Edit** icon.

My Story by OPS Trainer

My Story

6. On the **Story** 1 tab, click the **Product Group** drop-down, and in the **Group** filter in the right hand pane, select **All**. Ensure that the **Date or Province** filter is set as to **All**.

7. Zoom into the **Ontario** area, and in the **Sub Group** filter in the right hand pane, if required, select **Maritime** again to display all the sub groups (if all the sub groups are already displayed, then skip this step).

8. Click the **Selection** drop-down, and in the **Sub Group** filter in the right hand pane, if required, select **Maritime** again to display all the sub groups (all of the sub groups are already displayed, then skip this step).

9. Click the **Province** drop-down, and in the **Date or Province** filter in the right hand pane, select **All**.

10. In the toolbar of the workbook, select the **Story** 1 tab.
11. Ensure that the **Product Group** is set to **All**.
12. Ensure that the **Province** is set to **All**.
13. Ensure that the **Sub Group** is set to **Maritime** and the **Sub Group** is set to **All** (and zoom in if necessary).
14. Note that in the story, the **Count of Reinforcements** value is **4**.

15. Hover over the option of the **Reinforcements** story point at the top of the page. Click the **Edit in new point** icon.

16. The point is now the current story point. Change the caption to **Montana Reinforcements**.

17. Drag the **Map** to **add text** field and drag it to the top of the map.

18. Type **Reinforcements in Montana** in the value of **Montana** and click **OK**.

19. Ensure that the **Montana Reinforcements** story point caption is selected, then, in the left pane, click **Duplicate**.

20. In the **Count of Reinforcements** filter under control, slide the left side to 5. Then, in the **Date or Province** legend, select **Alabama**.

21. In the map, use the map tools to pan and zoom into the state of **Alabama** and then zoom in to the small blue shape.

22. Hover over the shaded part on the map to highlight the territory, over the **Alabama** postal code and note that the **Count of Reinforcements** value is 5.

23. Double click on the text box at the top of the map and change the text to **There were 5 reinforcements in the state of Alabama** and click **OK**.
24. Click and drag the caption box to move it to the top right of the map, and then click **Duplicate** to create a **Alabama Reinforcements** story point.

25. Click **Publish**.
26. At the bottom of the workbook, select the **Product Group** sheet tab.

27. Drag the **Ship** column to the **Rows** shelf.

28. In the **Ship** field pop-up box, click **All values**, and then click **Next**.

29. In the **Filter** field pop-up box, click the **Select** tab, and then click **Finish**.

30. In the **Filter** field pop-up box, select the **Wait** tab.
31. Ensure that the **Ship** is set to **Single value (slider)**, and then **Show filter** to hide it from the right hand pane.

32. In the **Filter** shelf, hover over **Ship**, and click the drop-down arrow, and select **Show filter** to display it in the right hand pane.

33. At the bottom of the workbook, select the **Story** 1 tab.
34. Ensure that the **Product Group** is set to **All**, and the **Sub Group** is set to **Duplicate**.
35. Ensure that the **Date or Province** is set to **Ontario**, and the **Ship** is set to **Regional Number of Technology Products**.

36. Drag the **Ship** slider to the highest value of 18.

37. In the **Group** filter, select **by Technology**.

Note that there is only one small area highlighted in the map.

38. Use the pan and zoom map tools to zoom in to that area of **California**.

39. Right click on the highlighted last area on the map, point to **Annotate**, then select **Mark**.

40. In the text box, after the phrase that says **WHAT GAMING OR TECHNOLOGY PRODUCTS IN THIS CITY?**, select the text, then type a **Space** and **Ship** and then click **OK**.

41. Click the **Save** drop-down at the bottom of the left pane, and from the drop-down list, select **Bookmark**.

42. Type the change in the text of the bookmark to now like the point a week.

43. In the upper navigation tab at the top of the page, select any one of the sheets and drag the bottom of that capture tabs horizontally and then vertically to increase the size of the entire capture (screenshot) tab.

44. Click the **Capture** icon in the left pane and then click the **Numbers** radio button and note the change in size of the story navigation tab.

45. Then, in **Size**,

46. And lastly, in **Screen only**.

47. Click **Publish**.

Congratulations! You have completed this lab and are ready for the next topic.
