Lab: Importing and Exploring Data in Tableau

Estimated time needed: **60** minutes

In this lab, you will learn how to navigate the Tableau Public User Interface (UI). You will also learn how to upload external data files to Tableau Public, explore the data, and create a simple visualization.

Required Software

You will complete this lab using the free Tableau Public or Tableau Public Desktop version.

Prerequisites

You need a free Tableau Public account for this lab. If you haven't already done so, you can sign up for an account using the steps here.

Data Set

The data analysis tools are called VIZ, Lists, designed to download Tableau data exploration.

And the CTA, the online you, the to download it from here

Objectives

After completing this lab you will be able to:

- Upload and connect to data
- Explore and visualize the data

Exercise 1: Upload and Connect to Data

In this exercise, you will learn how to upload and connect to data from external sources. Tableau supports a variety of data sources, including local files, cloud files, and connections to databases. In this lab, you will upload and connect to a local file.

1) In **Tableau Public**, on the home page, click **Create**, then select **Web Authoring**.
